

MOHAMMADSAANI SAYYAD

Data Analyst

Pune, India | 8149268024 | saanisayyed@gmail.com | mohammadsaani/linkedin | mds/portfolio | saanisayyed/github

Summary

Proficient in Data Visualization, Reporting, Dashboarding, Insight analysis with Computer Science Engineering background with hands on experience in SQL, Excel and Power BI. Honing strong analytical skills, decision-making, problem solving abilities with a learning mindset and proactive approach.

Skills

Programming and Query Languages: Python, SQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Databases: SQLite, SQL Server, MySQL

Visualization and BI: Power BI, Microsoft Excel, Dashboard Development, Data Visualization

Developer Tools: Jupyter Notebook, Google Colab, Git, GitHub, SQLAlchemy

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Train-Test Split, Cross-Validation, Hyperparameter Tuning, Scikit-learn

Data Analysis: Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Feature Engineering, KPI Analysis, Business Reporting

Projects

BigBasket Product Analysis | *Python, Power BI*

- Cleaned and transformed 27,555 BigBasket products by removing 354 duplicates, imputing missing ratings, and engineering discount features, producing an analysis-ready dataset of 27,199 products; created 10+ visualizations to analyze pricing, discounts, product distribution, and ratings.
- Built a 3-page Power BI dashboard with KPI cards and interactive slicers, revealing Beauty & Hygiene led the catalog at 28% share, Baby Care had the highest average price, and Kitchen & Garden and Fruits & Vegetables had nearly 2x the average discount rate.

Customer Shopping Behavior Analysis | *Python, SQL, Power BI*

- Cleaned 3,900 customer shopping records using Python (Pandas), imputing missing ratings by category and engineering age-group and purchase-frequency features; performed exploratory analysis to identify customer and purchasing trends.
- Wrote 10 SQL queries using CTEs, window functions, and subqueries, finding male customers generated \$157.9K in revenue vs. \$75.2K for female customers and only 27% were subscribers; built a Power BI dashboard with KPI cards, slicers, and 5 charts to track revenue and sales by category, age group, and subscription status.

Customer Churn Analysis | *Python, SQL, SQLite*

- Integrated customer, subscription, and support data from SQLite using Python (Pandas), cleaning and merging multiple tables into a unified churn dataset; analyzed churn rate, revenue at risk, and customer segments, identifying a 28.6% overall churn rate and 4x higher churn among Basic-plan users than Premium users.
- Created 10+ visualizations using Matplotlib and Seaborn to analyze churn drivers, finding referral-acquired customers churned at 83% vs. 0% for organic customers and a strong correlation ($r=0.77$) between support escalations and churn, highlighting opportunities for retention strategies.

Achievements and Certification

- **Data Analytics and Generative AI - WebAsha Technologies:** Completed Data Analytics certification covering Python, SQL, Excel, Power BI, and data visualization; currently pursuing Generative AI training focused on LLMs, prompt engineering, and practical AI applications.
- **SQL & Problem-Solving:** Solved 100+ LeetCode problems covering SQL, Data Structures, and Algorithms, and earned the HackerRank SQL (Intermediate) Certificate, demonstrating proficiency in CTEs, window functions, subqueries, and complex query writing.

Education

Bachelor of Engineering (Computer Engineering)

Amrutvahini College of Engineering, Sangamner

Graduated: 2025

CGPA: 7.76 / 10
